

BRUSSELS DESK

DESCRIPTION

The architectural design features on one side a heavy wood leg that conceals a storage compartment for a file drawer and a small utility drawer. The center of the piece conceals two long pencil drawers. The two drawers share a common finger groove that is beautifully detailed. The center sits on top a metal plate that bend in a 90-degree angle to become a delicate leg on the opposite side. It is available in nightstands or console.
